

# You hired for potential. Not for data entry into ERP systems.

There's a better use for brilliant people.

Finance, Sales, Inventory, and HR teams spend hours feeding a system that was supposed to work for them. Nova moves that work to AI agents, so your people can focus on what matters.

**7+**  
years building  
enterprise AI

**100+**  
enterprise  
solutions shipped

**50**

## / What Nova does

### Finance.

Month-end close shouldn't take half the month. Thirteen agents reconcile sales tax, 1099s, payroll, healthcare claims, interchange fees, and bank transactions, then handle P&L, AR, AP, cash flow, balance sheet, GL, and trial balance.

**97.9%**  
auto-match on  
bank reconciliation

Close in  
**3 days**, not 10.

### Sales.

Your best rep shouldn't be your best data entry clerk. Five agents score leads, track pipeline velocity, surface win and loss patterns, rank rep performance, and forecast committed and weighted revenue. Reps get told who to call. The CRM updates itself. Forecasts you can take to the board.

Forecasts you can take  
to the board.

### Inventory.

Your stock is everywhere. Your visibility isn't. Four agents track live stock across every location, forecast demand by pattern, prioritize warehouse picking and dock work, and flag aging stock early. One stock number everywhere. Reorders fire automatically. Dead stock caught months earlier.

One stock number  
everywhere.

### HR.

Your HR team is brilliant. They're just stuck at a helpdesk. Eight capabilities handle leave, expenses, attendance, grievances, and analytics, with an instant-answer agent for policy questions and a role-based directory. Employees get answers in seconds. Approvals in hours. 80% fewer HR tickets in month one.

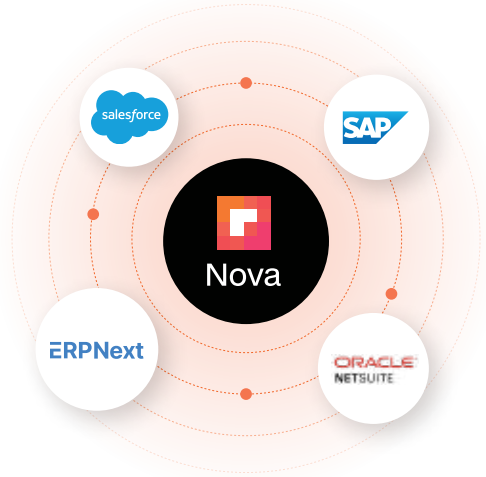

**80%** fewer  
HR tickets in  
month one.

# An AI layer on top of your ERP.

## Not a replacement.

Keep your ERP. Add the intelligence. Nova layers AI agents on top of Oracle NetSuite, ERPNext, Salesforce, SAP, or whatever you're already running. No migration. No disruption.

### Security.

SOC 2 Type II.  
ISO 27001 certified.  
GDPR ready. US data residency available.  
SSO, SAML, MFA, and role-based access throughout.

### Integrations.

Connects to existing ERP solutions like Oracle NetSuite, ERPNext, SAP and Salesforce

### Deployment.

Module by module. Most teams go live in 3 to 4 weeks. Cloud or on-premises. Per-module pricing, no surprise bills.

## / Proof in numbers

97.9%

bank transaction auto-match across live deployments

80%

drop in repetitive HR queries within 30 days

3 days

average month-end close, down from 10

3 to 4 weeks

to your first live module

## / Why Pixeldust

Nova isn't self-serve software you configure alone. Every deployment is managed by a Pixeldust team who studies your workflows before writing a line of configuration, and stays on to optimize as your business evolves.

### Start with a conversation.

- ✓ A 30-minute call.
- ✓ An honest look at where your team is losing time and what Nova can give back.
- ✓ An demo module implemented as proof of concept
